

CoolCrop develops technologies to help farmers, farmer co-operatives, entrepreneurs and aggregators preserve, manage and market their harvest to create more value from it.

We work with partner entities such as Non-Government Organizations (NGO), Self Help Groups (SHG), Financing Institutes, Market Committees and Government agencies to better realize the post-harvest storage, processing and marketing needs of the farmers or farmer co-operatives and therefore design and create hardware and software systems that are best-suited to cater to the challenges they face.

We are looking for creative and enterprising additions to our team to help us maximise the impact of our interventions and improve on our processes.

### **Position: Project Lead**

The role involves leading the execution of long-term projects by:

- Managing the activities defined in the scope including planning, execution, monitoring and closing the project.
- Liaising with local bodies, government agencies, state electricity departments, financing institutes for necessary co-ordination, site engineering approvals and building long-term partnerships. Working closely with technology and operations team for streamlining the project execution.
- Leading local team of technicians on execution and post-installation services.
- Working with customers, partners and users on post-installation training, operation and management of the systems.
- Creating necessary project documentation to be shared with project partners, stakeholders as well as management.

### **Skills and Aptitude:**

- At least 2 years of experience working on Energy/Engineering/Agriculture projects. Freshers with relevant project experience or expertise may also apply.
- Bachelors degree in Energy or Engineering or Agriculture is mandatory. Masters degree in either of those disciplines is a plus.
- Initiative and motivation to improve processes and products.
- Good spoken and written communications skills. Sound knowledge of English & Hindi. Knowledge of additional local dialects /regional languages is a plus
- Willing to travel as needed.

Location: Chandigarh/Shimla/Bengaluru, India
